Information Systems at the Faculty

During your studies at Charles Unniversity and the Faculty of Humanities, you will encounter several information systems. The applications you will get to know the most during your studies are:

- SIS (Student Information System)
  Videotutorials:
  - Confirmation of study
  - Course enrollment
  - Exam status e-mail notification

- Moodle – online e-learning platform
- CAS (Central Authentication Service)
- Web applications – you can submit your ERASMUS applications and applications for the Charles University Grant Agency via the web applications. Your login info is identical with your login into CAS.
- **Eduroam** – a worldwide network which allows students, researchers, and staff from participating institutions to obtain Internet connectivity across campus and at other participating institutions. You can set up your password in the CAS. To log in, use your student number (located underneath the photo on your ISIC card) followed by @cuni.cz (i.e. 12345678@cuni.cz) as your username.

If you encounter a problem with any of these systems, please, contact our IT Office .
