
Mgr. et Mgr. Markéta Zandlová, Ph.D.

Research Areas

Markéta Zandlová, Ph.D., is a social anthropologist. She has long been devoted to the anthropology of borders and the process of social identity construction, especially ethnic identities (monograph Zandlová, M. 2015. *The Aromo in Bulgaria*. Prague: FHS UK). In recent years, in addition to methodological issues of ethnographic research, she has focused on the social aspects of climate change, which she has explored through discourses and practices associated with increasing drought in the Czech Republic. In her studies, she combines contemporary concepts of environmental anthropology with the analysis of knowledge distribution and infrastructural networks.

She is currently the principal researcher of the interdisciplinary applied project *Stories of Drought: Local Contexts of Extreme Climate Phenomena, Their Perception and the Willingness of Actors to Participate* (www.pribehysucha.cz).

In 2021 she was elected Chair of the Czech Association for Social Anthropology (CASA); she is a founding member of the EASA Environment and Anthropology network and a member of the Academic Senate of FHS UK.

- Anthropology of climate change
- Identity studies
- Border studies
- Urban anthropology
- Applied anthropology
- Qualitative methodology and research ethics
